IBC SPILL CONTAINMENT PALLET FOR 3 IBC

The RX3IBC is a robust, rotationally moulded spill containment solution engineered for reliable secondary containment, easy handling and compliant with UK oil storage regulations - specifically the Control of Pollution (Oil Storage) (England) Regulations 2001.

Features

- Rotationally moulded, 100% recyclable construction
- Stackable and nestable to improve transport efficiency
- Suitable for forklift, pallet jack and pallet truck handling
- Equipped with four removable support columns, enabling the unit to safely support loads of up to 3000kg
- Three separate grids ensuring each IBC has its own secure platform

Main Benefits

- Chemical resistant polyethylene material
- Suitable for oils, fuels and industrial liquids
- Easy-clean, low maintenance surface
- Indoor and outdoor use
- Improves spill compliance and site safety
